

200 mm

1

With the current settings, I was unable to print 1 mm to the right of the paper, but the space is part of the drawing. Verify that the square is centered!

TEST PAGE

Central square of 50 x 50 mm should be perfectly centered on the page. The pages will be arranged side by side without overlap between them.

2-2

The image is an abstract geometric composition on a light gray background. A central square, outlined in a thin gray line, contains the text "2-2" in a red, stylized, blocky font. Several lines intersect across the frame: a blue line runs diagonally from the bottom-left towards the top-right; a green line runs diagonally from the top-left towards the bottom-right; a red line curves from the left side towards the top-right; and a purple line is visible in the top-left corner. The lines intersect each other and the central square, creating a complex geometric pattern.
