

PARKER V3

Ultralight harness

Very important:
The straps in red must be done from a single length of webbing

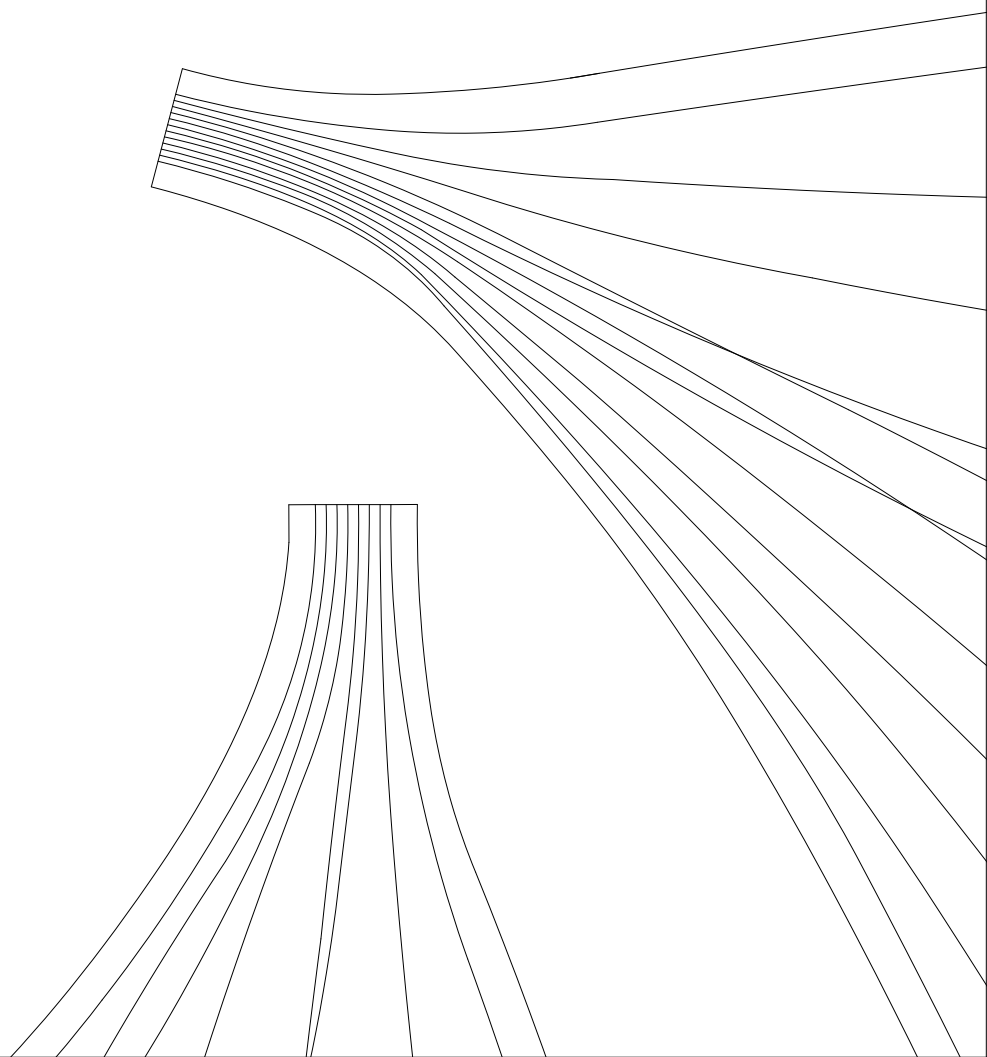

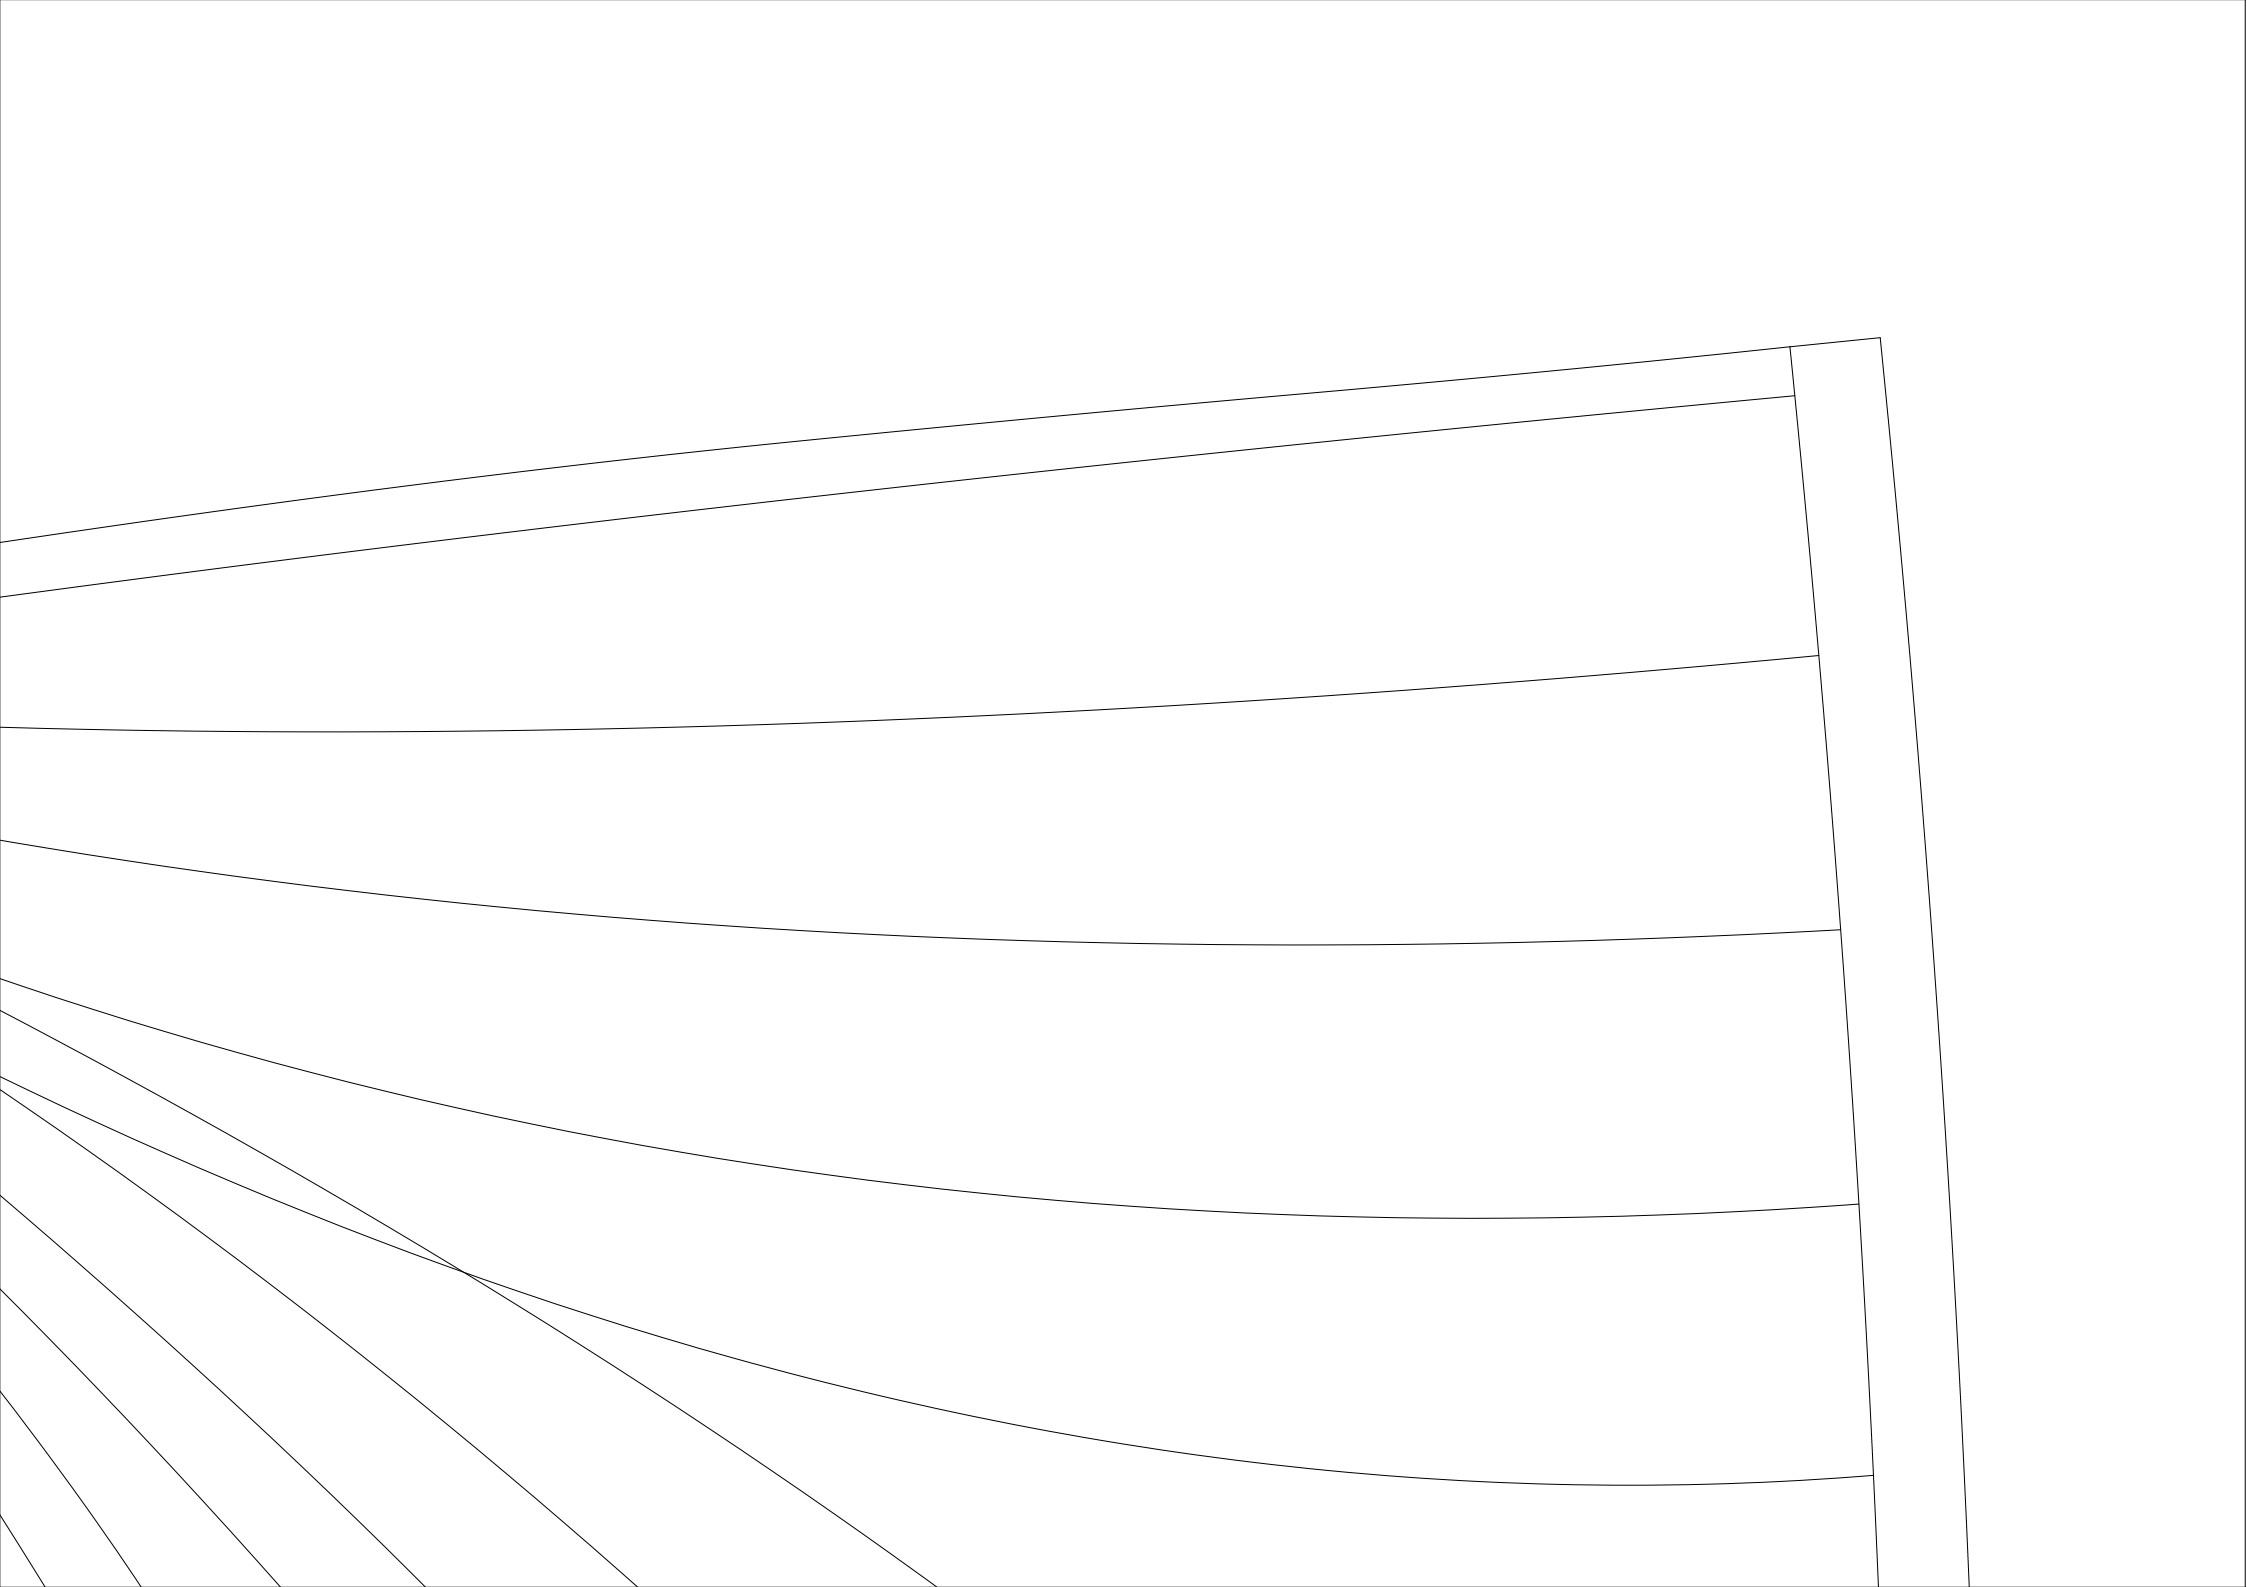

Materials:

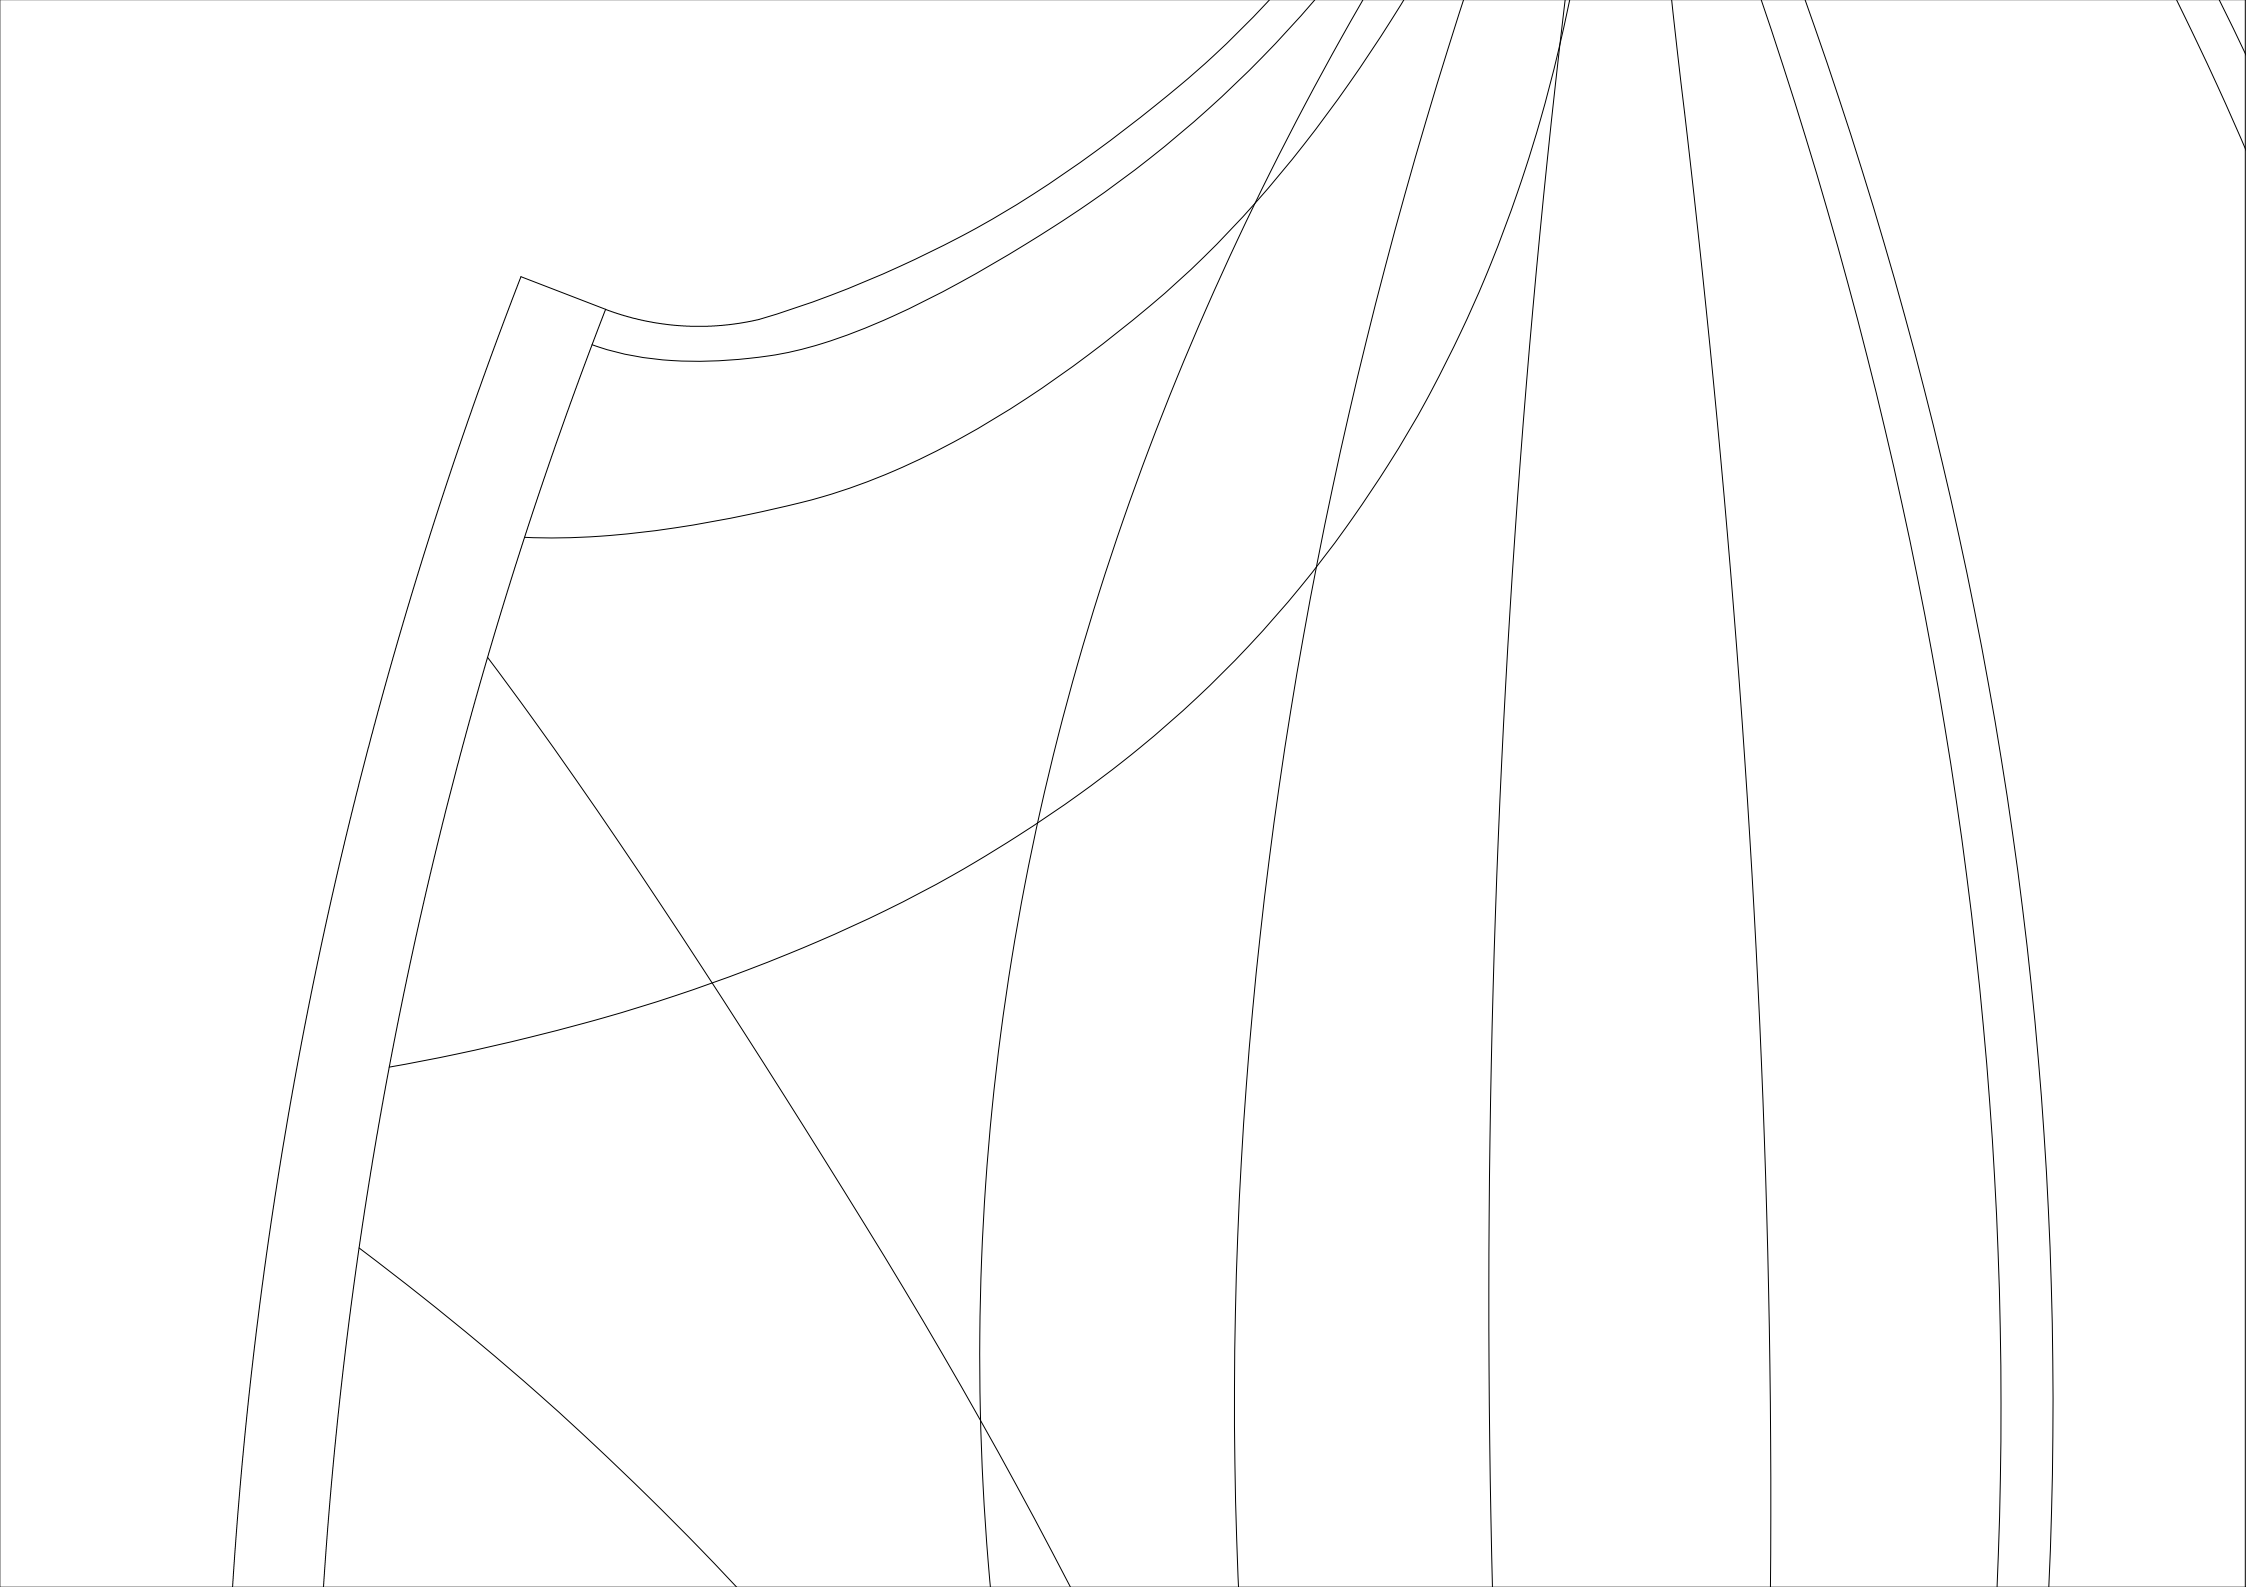

- Generic ripstop nylon cloth, for the seat
- Dyneema/Spectra braided line, 1mm diameter 8 strands, for the structural web (about 25m are necessary)
- Dyneema 12mm webbing, for the straps
- Generic elastic string, for the shoulder straps (about 1.30m are necessary)
- Polyester craft felt, 4mm thick, for the leg stiffeners
